## Datasheet

### Inscription label holders

- ASCF
- VMPA
- CPV
- CPX

Inscription label holders enable inscription labels to be attached to components that do not have a prefabricated mount or a mount specifically for this type of holder.

If the inscription label holder covers display elements, the holder will be partially or entirely transparent.

 **Note**

Templates for inscription label holders/identification strips can be found via the online product search tool:

→ [www.festo.com](http://www.festo.com)

Storage temperature	[°C]	–	–	–	–	–	–	–	–	–
Corrosion resistance class (CRC)		–	2 <sup>3)</sup>	1 <sup>2)</sup>	2 <sup>3)</sup>	–	0 <sup>1)</sup>	0 <sup>1)</sup>	0 <sup>1)</sup>	–

Operating and environmental conditions		VMPAL-ST-AP...	CPV...VI-ST...	CPX-ST-1
Ambient temperature	[°C]	–	–	–5 ... +50
Storage temperature	[°C]	–	–	–20 ... +70
Corrosion resistance class (CRC)		4 <sup>4)</sup>	2 <sup>3)</sup>	–

- 1) Corrosion resistance class CRC 0 to Festo standard FN 940070  
No corrosion stress. Applies to small, visually irrelevant standard parts such as threaded pins, circlips and clamping sleeves which are usually only available on the market in a phosphated or burnished version (and possibly oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.
- 2) Corrosion resistance class CRC 1 to Festo standard FN 940070  
Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind covers, in non-visible internal areas, or parts which are covered in the application (e.g. drive trunnions).
- 3) Corrosion resistance class CRC 2 to Festo standard FN 940070  
Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.
- 4) Corrosion resistance class CRC 4 to Festo standard FN 940070  
Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. Such applications may need to be safeguarded by special tests (→ also FN 940082), using appropriate media.

Inscription sizes for inscription label holders VTUG

## Datasheet

### Examples of how to attach inscription label holders

#### VMPA1-ST... for valve terminal MPA-S

- [1] Inscription label holder VMPA1-ST...
- The inscription label holder is snapped into recesses on the valve terminal
  - Identification strips can then be inserted to identify the component

#### VMPAL-ST... for valve terminal MPA-L

- [1] Inscription label holder VMPAL-ST... for sub-bases of valve terminal MPA-L
- [2] Inscription labels IBS-6x10
- The inscription label holder is snapped into recesses on the valve terminal
  - An inscription label IBS-6x10 can then be attached to identify the component

#### ASCF-M-S6 for valve terminal VTSA/VTSA-F

- [1] Inscription label holder ASCF-M-S6 for manifold sub-base, sub-base, 90°-connection plate of valve terminal VTSA/VTSA-F
- The inscription label holder is snapped into a recess on the manifold sub-base, sub base or 90°-connection plate

#### ASCF-T-S6 for valves VSVA

- [1] Inscription label holder ASCF-T-S6 for valves VSVA
- The clip-on inscription label holder is pushed into the valve
  - Identification strips can then be inserted to identify the component

#### CPVSC1-ST... for valve terminal CPV-SC

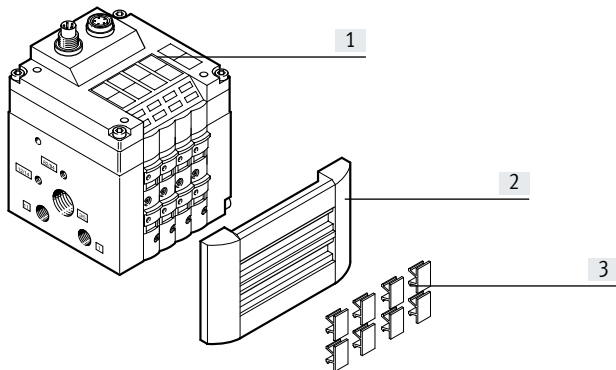

- [1] Inscription label holder CPVSC1-ST... (dimensions depend on the valve positions) for valve terminal CPV-SC
- The inscription label holder is clipped onto the valve terminal
  - Identification strips can then be inserted to identify the component

## Datasheet

### Examples of how to attach inscription label holders

CPV...-VI... for valve terminal CPV

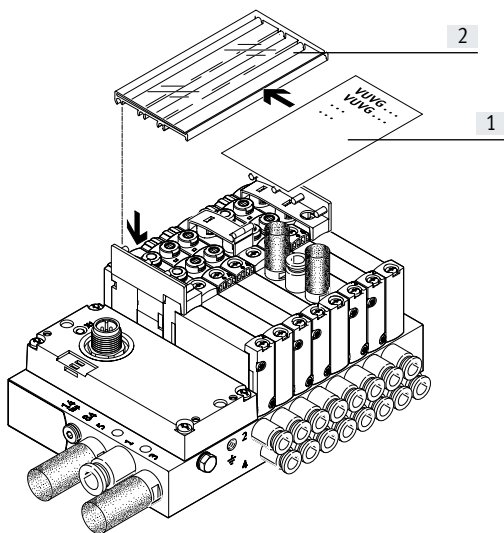

- [1] Inscription labels IBS-6x10 for CPV10/14, type IBS-9x20 for CPV18
- [2] Inscription label holder CPV...-VI...
- [3] Inscription labels IBS-6x10

- The inscription label holder is snapped into recesses on the valve terminal
- Labels or identification strips can then be inserted to identify the component

 **Note**  
The inscription label holder cannot be used together with relay slices.

ASCF-H-L1... for valve terminal VTUG

- [1] Inscription label (dimensions depend on the size and valve positions) for valve terminal VTUG
- [2] Inscription label holder ASCF-H-L1... (dimensions depend on the size and valve positions) for valve terminal VTUG

- The inscription label holder is snapped into recesses on the valve terminal
- Identification strips can then be inserted to identify the component

 **Note**  
Do not engage the manual override before mounting the inscription label holder.  
When mounted, the retainer for the inscription label holder covers the manual override of the valves beneath it.  
The manual override for both valves can then only be operated as non-detenting.

## Datasheet

### Examples of how to attach inscription label holders

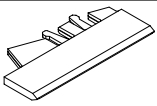

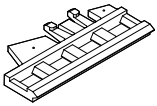

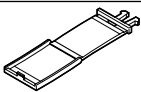

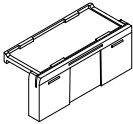

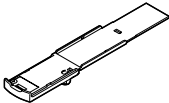

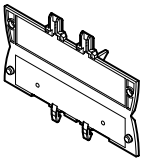

ASCF-T-S6, ASCF-M-S6, ASCF-M-S2-2 for valve terminal VTSA/VTSA-F

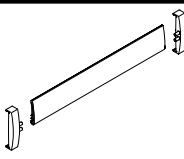

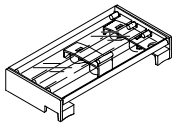

- [1] Inscription label holder ASCF-T-S6 for valves of valve terminal VTSA/VTSA-F
  - [2] Inscription label holder ASCF-M-S6/ASCF-M-S2-2 for manifold sub-base, sub-base, 90°-connection plate of valve terminal VTSA/VTSA-F
  - [3] Inscription label on the pneumatic interface
- The inscription label holder ASCF-T-S6 is affixed to the valve
  - The inscription label holder ASCF-M-S6 is snapped into a recess on the manifold sub-base, sub-base or 90°-connection plate.
  - The inscription label holder ASCF-M-S2-2 is snapped into a recess on the manifold sub-base (for valve width 52 mm).
